More information about this job:

Overview:

Technical Project Manager

Portland, OR

Responsibilities & Requirements:

Are you an innovative and motivated Project Manager looking for an opportunity to be part of a forward thinking company working to change the health care system? Do you like to think beyond the normal boundaries and status quo? Do you have strong leadership skills and an ability to drive work? Can you thrive in fast moving environments? If you have this experience and can embrace change, then we want you to take a look at Cambia.

We're looking for a Technical Project Manager who is able to work in a team environment across a highly matrixed organization and serve as a trusted partner with business leaders to deliver quality products.

Accountabilities:

- Delivers high quality products through effective planning, task definition, scope management, resource allocation and negotiation, risk mitigation, cost management, and stakeholder communication.
- Develops and maintains strong working relationships with business partners and collaborates closely to deliver optimal technical solutions which meet business needs.
- Responsible for monitoring and reporting on work effort tasks, deliverables, costs, resources, issues, changes and risks.
- Lead multiple work efforts ensuring timely deliverables within budgetary constraints and proactively recommends courses of action to maintain cost effectiveness.
- Ensures timely resolution of conflicts in order to maintain delivery schedule.
- May act as ScrumMaster for one or more Agile teams.
- Manages large and complex work efforts for the business area.

Your professional experience and education include:

- Bachelor's Degree in Business or related field and a minimum five years progressive project management experience to include managing multiple, large scale or highly complex projects concurrently or an equivalent combination of education and experience.
- Exceptional leadership skills including ability to influence without authority.
- A high-level technical understanding of business requirements as they pertain to the project lifecycle including demonstrated excellent analytical and problem solving skills.
- Experience working effectively with minimum supervision, and working with business sponsors and partners, to identify and implement solutions.
- Demonstrated ability to motivate teams to achieve defined deliverables.
- Strong ability to identify problems, mediate issues, develop solutions and implement a course of action.
- Innovative conflict resolution skills.
- Demonstrated success at meeting budget, timelines, and requirement targets and managing variances.
- Demonstrated experience with agile development tools.
- Robust interpersonal and communication skills including writing, presenting, listening, and facilitating.
- ScrumMaster Certification (CSM) or PMI-ACP certification (PMI Agile Certified Practitioner) is preferred.

Position is posted at levels II or III depending on experience.

About Us:

At Cambia, we advocate for transforming the health care system. You aren't satisfied with the status quo and neither are we. We're looking for individuals who are as passionate as we are about transforming the way people experience health care. We offer a competitive salary and a generous benefits package. We are an equal opportunity employer dedicated to workforce diversity and a drug and tobacco-free workplace. All qualified applicants will receive consideration for employment without regard to race, color, national origin, religion, age, sex, sexual orientation, gender identity, disability, protected veteran status or any other status protected by law. A drug screen and background check is required.

Cambia's portfolio of companies spans health care information technology and software development; retail health care; health insurance plans that carry the Blue Cross and Blue Shield brands; pharmacy benefit management; life, disability, dental, vision and other lines of protection; alternative solutions to health care access; and free-standing health and wellness solutions.

We have nearly a century of experience in developing and providing health solutions to serve our members. We had our beginnings in the logging communities of the Pacific Northwest as innovators in helping workers afford health care. That pioneering spirit has kept us at the forefront as we build new avenues to improve access to and quality of health care for the future.
